

ABSTRACT OF THE DISCLOSURE

A modified gelatin obtained by reacting (A) a
gelatin and (B) a compound which contains a nitrogenous
aromatic ring having a mercapto group to form covalent
5 bond with a reactive group in the gelatin, an
introduction amount of the compound in the gelatin
being 1.0×10^{-6} mol to 2.0×10^{-3} mol per 100g of the
gelatin.
